

### North European & Alps forests

Dominated by coniferous forests

High agreement between models

Overall increase in suitability

Consider new opportunities to improve resilience

### Mediterranean and Atlantic forests

Some fact...

High agreement between models

Overall decrease in suitability

Introduce better-adapted populations (and species)

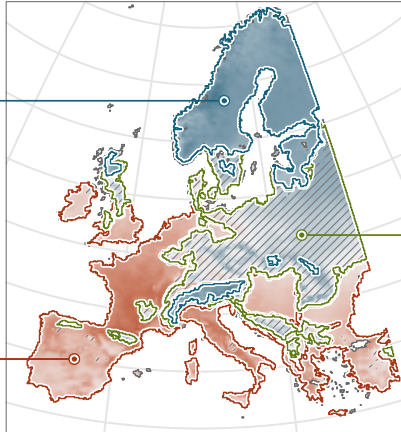

### Continental & mid-mountain forests

41.9% of total timber harvest (2000-2010)

Low agreement between models

No clear trend in suitability

Increase diversity to mitigate risks

Average suitability change

Low model agreement
