

North European & Alps forests

Dominated by coniferous forests

High agreement between models

Overall increase in suitability

Consider new opportunities to improve resilience

Mediterranean and Atlantic forests

Some fact...

High agreement between models

Overall decrease in suitability

Introduce better-adapted populations (and species)

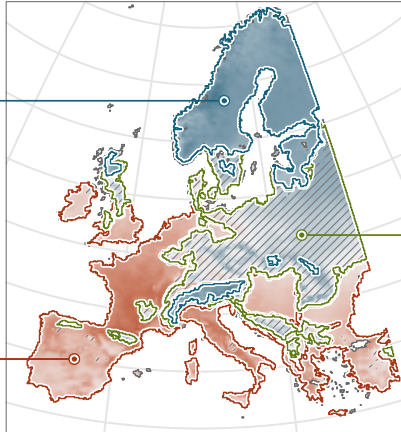

Continental & mid-mountain forests

41.9% of total timber harvest (2000-2010)

Low agreement between models

No clear trend in suitability

Increase diversity to mitigate risks

Average suitability change

Low model agreement
